EXPERIENCE

Software Engineer, Atlassian (Trello)

Remote, August 2021 – April 2025

· Led a project to replace Redux usage with GraphQL across the web codebase
· Presented on Jest and React Testing Library at company front end forum
· Reduced dependency debt by over half for a project I led across repos owned by my team
· Maintained the Trello desktop app and improved documentation after the previous owners left the team

Software Engineer, Splunk

Boulder, CO, May 2019 – August 2021

· Developed a GraphQL API using Apollo Server and consumed by a React app
· Steered front-end development for an internal customer support interface built from an OpenAPI definition and architected to follow compliance requirements
· Maintained and grew the marketing site for VictorOps (Splunk acquiree)

Software Developer, PenLink

Boulder, CO, March 2018 – May 2019

· Set up a CI/CD pipeline that relied on unit tests passing and deployed to AWS
· Worked on building performant data visualizations using SVG and Vue JS
· Created access control logic within a web app to restrict certain features to different subscription tiers

Front-End Developer, Imagination International Inc.

Eugene, OR, February 2017 – February 2018

· Built a chat system with Vue JS and Firebase for messaging in an online classroom prototype
· Supported custom development request for marketing websites and accounting software
· Spearheaded a code review process amongst development team
